I really learned a lot from this website.

Cadet, Jean Lud. "Methamphetamine." Encyclopedia of Drugs, Alcohol, & Addictive Behavior. By Pamela Korsmeyer and Henry R. Kranzler. 3rd ed. Vol. 3. Detroit: Macmillan Reference USA, 2009. 30-31. Print. In this article, the author talks a lot about the statistics involving this substance. It also has a lot of information on the short and long term affects that this substance can have on a person, and also what physiological affect it have on their brain. This article seems like it would be helpful to my research.
